

Exploitation de La fonction RADIO-COMMUNICATION

Système RECEPTEUR :

MICRObit1

Programme

en

CARTE 1

```
au démarrage
  radio set group 1

on radio received receivedNumber
  si receivedNumber = 2
  alors afficher texte " A "
  si receivedNumber = 3
  alors afficher texte " B "
```

Programme en CARTE 2 :

A screenshot of the Microsoft MakeCode editor interface. The top bar shows 'micro:bit', 'Projects', 'Share', 'Blocks', 'JavaScript', and the Microsoft logo. The left sidebar contains a search bar and a list of categories: Basic, Input, Music, Led, Radio, Loops, Logic, Variables, and Math. The main workspace shows a program with three blocks: 'on start' with 'radio set group 1', 'on button A pressed' with 'radio send number 2', and 'on button B pressed' with 'radio send number 3'. A 'Getting Started' button is visible in the top right. A blue box in the bottom left corner says 'HOW THIS WORKS?'. A black box on the right side contains the text 'Système EMETTEUR : MICRObit2'. A grey box at the bottom contains the text 'La carte qui permet d'envoyer le signal bouton A ou bouton B appuyé...'.
